

James Professional Resume

James

James

Student — Python Developer — AI Enthusiast

Email: james@email.com — Location: City, Country — GitHub: github.com/james

Education

- **High School Diploma (Class 12)** Expected 2024
- Focused on Mathematics, Physics, and Computer Science.
- Maintaining a high academic standing with a focus on technical problem-solving.

Technical Skills

- **Languages:** Python (Proficient), LaTeX (Advanced Typesetting).
- **AI & Machine Learning:** Basic Neural Networks, LLM Integration, Prompt Engineering.
- **Tools:** Git, VS Code, Linux Terminal, PDF Libraries (ReportLab, PyPDF2).
- **Soft Skills:** Logical Reasoning, Technical Writing, Rapid Prototyping.

Projects

- **AI PDF Generator**
 - Engineered a Python-based tool that leverages AI to generate structured PDF documents from raw text inputs.
 - Integrated OpenAI API to summarize and organize content dynamically.
 - Utilized LaTeX backends to ensure professional-grade typesetting and document formatting.
 - Automated the conversion process, reducing document creation time by 80%.
- **Automated LaTeX Resume Builder**
 - Developed a script to parse JSON data and populate LaTeX templates for various job roles.
 - Streamlined the process of maintaining up-to-date professional profiles.

Extracurricular Activities

- **Coding Club Member:** Collaborated with peers on open-source Python scripts and algorithm challenges.
- **Self-Directed Learning:** Completed various certifications in Artificial Intelligence and Data Science fundamentals.
- **Tech Blogger:** Write short guides on using LaTeX for academic projects and Python automation.

Achievements

- Ranked in the top 10% of school-level Mathematics Olympiad.
- Successfully deployed three functional Python applications to GitHub.
